## PAVIGYM'S DNA: WHY CHOOSE PAVIGYM FLOORING?

At Pavigym, we believe that the foundation of a great gym starts with the flooring. It's more than just a surface — it's an essential element that affects safety, durability, performance, and aesthetics. Choosing the right flooring can protect your equipment, enhance the user experience, and reduce long-term costs.

With so many options, why choose Pavigym? We're more than manufacturers, we're flooring experts. We understand that a poor flooring decision can lead to higher costs, safety risks, and long-term damage to your gym's reputation. **That's why we offer solutions for all budgets**, helping you avoid the hidden costs and hazards of low-quality alternatives. Our consultative approach means we'll assess your needs, explain material and system nuances, and recommend the ideal solution for your space and strategy. From superior materials, or low cost alternatives to smart installation systems, every detail of a Pavigym floor is made to deliver long lasting results. **Leave it in our hands, we'll advise you every step of the way for true peace of mind.**

## FITNESS FOCUS – PURPOSE-BUILT FLOORING FOR EVERY GYM AREA.

At Pavigym, fitness flooring is not one market among many. It is our area of expertise.

For over 60 years, we have focused on designing practical flooring solutions for real fitness environments. This experience helps us understand that every area of a gym has different needs, from free weights and cardio zones to functional training, studios, corridors, changing rooms, premium spaces, boutique concepts, upper floors and large chains.

A gym is not just another building. It is a space shaped by movement, impact, sweat, heavy traffic, cleaning routines, acoustic challenges, safety requirements and user experience. That is why our floors are developed from the beginning around the realities of fitness use.

This focus is reflected in every decision we make: material selection, product structure, surface behaviour, impact resistance, acoustic performance, maintenance, installation and long-term reliability. By creating specific systems for each zone, activity and demand level, Pavigym helps fitness spaces perform better, last longer and support a better training experience from the ground up.

Specialist flooring for every fitness challenge — **peace of mind built on over 60 years of expertise.**

# 02

## QUALITY AND INNOVATION – SMART FLOORING TECHNOLOGY FOR REAL GYM CHALLENGES.

We innovate to improve how fitness flooring performs in real gyms. By combining material expertise, production know-how and smart systems, Pavigym develops practical solutions for everyday challenges such as impact, grip, hygiene, acoustics, fire performance, cleaning, installation and connectivity.

This expertise is built into our products through advanced materials, proprietary technologies and systems designed specifically for fitness environments. The result is flooring that helps make spaces safer, more efficient and easier to operate.

Sustainability is part of the same approach, guiding our material choices and production processes to support long-term performance and more responsible manufacturing.

At Pavigym, innovation means turning specialised knowledge into flooring solutions that respond to the real needs of operators, installers and users.

Smarter technology, better performance — **peace of mind from the ground up.**

## BEST ROI – FLOORING WITH LONG-TERM VALUE IN MIND.

Best ROI means looking beyond the initial investment and focusing on the full value of flooring across its entire life cycle. With Pavigym, every square metre is designed to contribute to a stronger, safer, better-looking and more efficient fitness space.

Our Best ROI approach is built around four key ideas:

- **Outlast Flooring solutions** designed to last longer, withstand intensive daily use and hold their performance over the years.
- **Outperform Technical surfaces** that deliver more where it matters: hygiene, grip, comfort, impact absorption, acoustic control, stability and safety.
- **Outdesign Floors** that go beyond performance. They elevate the look and feel of the gym, support customisation and help create a stronger visual experience.
- **Optimised installation and maintenance Systems** designed to simplify project execution, reduce installation time and minimise disruption. modular tiles also allow damaged areas to be replaced quickly without closures, construction work, or affecting the surrounding area.

Lasting performance, easier maintenance and less disruption — **peace of mind for the lifetime of your investment.**

# 04

## HYGIENE AND SAFETY – CLEANER AND MORE CONFIDENT SPACES.

In fitness environments, hygiene and safety shape how people move, train and experience the space every day. At Pavigym, both are built into the design of our flooring from the start, helping clubs create environments that feel cleaner, safer and more comfortable for users, staff and operators.

Our materials, surfaces and systems are developed to resist bacterial growth, minimise porosity and make cleaning easier. At the same time, they provide reliable grip, impact absorption and acoustic control, supporting safer movement and a more comfortable training experience.

Solutions such as smooth transitions between zones and integrated cable management also help improve circulation, reduce trip hazards and simplify daily operations. The result is flooring that actively supports how a facility works, not just how it looks.

Cleaner surfaces, safer movement and protection by design — **peace of mind for users, staff and operators.**

## 360° SUPPORT

### – GUIDANCE AT EVERY STEP OF THE FLOORING PROJECT.

Your gym should reflect your identity and vision. Many flooring solutions only come in standard black rubber, offering no room for personalisation.

Pavigym offers full customisation options, allowing you to:

- G Choose from a variety of colours and textures** to match your gym's aesthetic.
- G Add functional markings** to improve training areas and guide members.
- G Incorporate your gym's logo** to reinforce brand identity and professionalism.
- G Get expert support from our in-house design team,** who can create detailed 2D and 3D blueprints and recommend the best layouts to optimise your space.

Whether you're a boutique studio, a large fitness chain, or a corporate gym, Pavigym helps you create a space that is both visually appealing and functionally optimised.

A gym that looks, feels, and functions exactly as you imagined - **peace of mind, by design.**
